LinkedIn: https://www.linkedin.com/in/abraham-hong
GitHub: https://github.com/abrahamin
Portfolio: https://abrahamin.github.io/2-Professional-Portfolio

Full-stack web developer dedicated to optimizing the comprehensive experience on the web, encompassing all areas ranging from creating a more user-friendly client interface to increasing the efficacy of server-side software. Proficient in HTML, CSS, JavaScript, and Node.js, with an emphasis on responsive, mobile-first web design, obtaining a certificate from the Full Stack Flex course via Georgia Tech Professional Education. Confident in completing tasks in a timely manner as a methodical and prudent problem solver. Worked on a team of four, applying agile development concepts to develop a web application that allows junior software developers to compare job opportunities in relation to local data points. Inspired to approach programming challenges from various perspectives and collaborate with others as a means to produce multifaceted products that please the client. Versatile in learning new technologies and languages and adept at incorporating my strengths to work with a group seamlessly. With each project, my passion is to create a memorable user experience for each client. Motivated to incorporate my skills as a member of an efficient, quality-focused team to shape a culture of premium web experiences and products.
